### Status of occupancy rate as of each FP end

### Status of Lease Signings

\* The above graph shows figures for leased floor area for MFLP-REIT properties after new acquisitions (excluding MFIPs) based on leases signed as of July 31, 2023.

## Impact of rising electricity costs

### Breakdown of electricity costs by facility type (based on floor area)

Majority of electricity costs borne by tenants (MFLP-REIT only bears electricity costs for common areas in multi-tenant properties). MFLP-REIT's exposure to electricity costs is limited.

### Factors depressing utilities expense margin

#### Electricity usage

|                       | 12th FP | 13th FP | 14th FP (YoY)        |

\*The electricity consumption of multi-tenant properties (excluding MFLP Osaka Katano) is indexed based on the 12th fiscal period.

① Tenant area usage down on energy saving measures

② Common area usage also reduced but offset by inflation impact on electricity unit prices

### Promoting transition to green power

From April 2023, in addition to the 7 properties that had previously been converted to green power, 5 properties in Greater Tokyo, Greater Nagoya, Greater Osaka and Hiroshima areas have started converting common areas to green power. In addition, we have established a system for supplying green power to tenants in dedicated areas as well. As of October 2023, we plan to introduce green power in common areas of properties in Greater Osaka, and we expect to complete green power transition in common areas at a total of 14 properties.

## Impact of 6 acquisitions in the 6th PO (after adjusting for temporary effects)

- As a result of the acquisition of 6 properties through the 6th PO, MFLP-REIT's total NOI, total FFO and net income increased significantly
- After retaining funds on hand (Total FFO – Total distributions) of around 2 billion yen, MFLP-REIT continues to consider measures to enhance unitholder value
- MFLP-REIT revised its distribution policy to align it with its growth stage, raising the FFO payout ratio. As a result, DPU growth from the 13th FP is assumed to increase in 6.5% (average annual growth rate), on the back of an increase of NOI and FFO per unit after the 6th PO and acquisition of 6 properties, and the impact from the rise in payout ratio from 70% to 73%
- Although EPU in the 16th FP is forecasted to decline slightly on dilution resulting from the 6th PO and conservative operating assumptions, MFLP-REIT continues to aim to grow EPU and enhance unitholder value

[Method of calculation of cash distribution based on FFO]

(1) Distribution of earnings is determined based on profit (net income) for the applicable operating period.

(2) FFO for the applicable operating period is calculated by adding depreciation to profit (net income) (excluding gain or loss on sale of real estate, etc.) for the applicable operating period.

(3) the amount distributable including distribution in excess of earnings is calculated based on a threshold of at equivalent up to a maximum of 75% of FFO for the applicable operating period.

(4) the amount distributable in excess of earnings is calculated by deducting the amount of distribution of earnings (excluding gain or loss on sale of real estate, etc.) from the amount distributable including distribution in excess of earnings.

(5) the amount of continuous distribution in excess of earnings is determined based on a comprehensive judgment on the basis of the amount distributable in excess of earnings.

(6) the distribution in excess of earnings determined in 5. above is to be continuously made each fiscal period in principle, in addition to the distribution of earnings determined in 1. above.

In addition, in cases where the distribution amount for distributions per unit is expected to temporarily decline by a certain degree due to such factors as the procurement of funds through the issuance of new investment units, etc., a one-off distribution in excess of retained earnings may be executed in order to standardize the amount of the distributions per unit.

[Earnings Forecast]

Until the 15th FP (fiscal period ending January 31, 2024), in the case of concluding a lease contract that reduces the rent for a certain period of time because of free rent or the like, revenue is recognized at the reduced rent for the said certain period and in the case of concluding a lease contract in which the rent fluctuates during the lease period, revenue is recognized at the rent corresponding to each period. From the 16th FP (fiscal period ending July 31, 2024), only when the total amount of rent after February 1, 2024 in the lease contract is fixed, the calculation method will be changed to recognize revenue on a straight-line basis over the contract period after February 1, 2024, including such certain period and fluctuation period. Whether this accounting policy will be changed has not yet been determined.

[ZEB certification]

ZEB (Net Zero Energy Building) is a building that aims to achieve a zero energy balance through substantial reductions in annual primary energy consumption. this is achieved by saving as much energy as possible via better thermal insulation of the building and highly

efficient equipment, coupled with creating energy by photovoltaic power generation (or other energy generating methods), while maintaining a comfortable environment. In the BELS certification system, the certification of the level of ZEB is presented in four stages: "「ZEB」", "「Nearly ZEB」", "「ZEB Ready」" and "「ZEB Oriented」". "ZEB Ready" is awarded to buildings that achieve primary energy reduction of 50% or higher.

[About analysis of Japan's logistics facilities stock]

(1) The "Analysis of Japan's logistics facilities stock" graph is of estimates by CBRE K.K. based on the Policy Bureau of the Ministry of Land, Infrastructure, Transport and Tourism's "Building Starts" and the Ministry of Internal Affairs and Communications' "Summary Report on Prices, etc. of Fixed Assets."

(2) In the "Analysis of Japan's logistics facilities stock" graph, "Leading-edge logistics facilities" is the figure of each year's sum total of the gross floor area of leading-edge logistics facilities (refers to rental logistics facilities that have gross floor area of at least 10,000 m<sup>2</sup>

and, in principle, ceiling height of at least 5.5 meters, floor load capacity of at least 1.5 tons/m<sup>2</sup> and column spacing of at least 10 m).

(3) In the "Analysis of Japan's logistics facilities stock" graph, "Estimate for logistics facilities 40 years old or older" is the figure of each year's overall stock estimate (as covered by note 5; the same shall apply hereinafter) minus the sum total of the floor area of which

construction was started within the past 40 years.

(4) "Estimate for logistics facilities less than 40 years old" is the figure of the overall stock estimate minus the floor area of "Estimate for logistics facilities 40 years old or older" and "Leading-edge logistics facilities."

(5) the overall stock estimate is the sum total of "Estimate for logistics facilities 40 years old or older," "Estimate for logistics facilities less than 40 years old" and "Leading-edge logistics facilities."

(6) In the "Analysis of Japan's logistics facilities stock" graph, "Share of leading-edge logistics facilities" is each fiscal year's "Leading-edge logistics facilities" expressed as a percentage of the overall stock estimate (gross floor area basis).

(7) In the "Analysis of Japan's logistics facilities stock" graph, "Share of logistics facilities 40 years old or older" is each fiscal year's "Estimate for logistics facilities 40 years old or older" expressed as a percentage of the overall stock estimate (gross floor area basis).

(8) "Gross floor area" is compiled based on data on construction starts. In addition, estimates are on the basis of the time of construction completion being that construction is deemed to be completed after one year has elapsed from construction start. Accordingly, gross floor area may not match the floor area on the building confirmation certificate, construction completion drawing or register.
